

## FAQs – Glass

- **Can we recycle other glass items, such as Pyrex? If not, why not?**  
The only glass we can accept for recycling is container glass, such as wine bottles, jam jars, sauce jars etc.  
Other glass items have different chemical properties and cannot be recycled with container glass.  
For example Pyrex and Ceramics melt at much higher temperatures than normal glass containers and would therefore hamper the reprocessing and resulting end products.
  
- **Can we recycle the lids from glass bottle and jar?**  
Metal lids from glass bottles and jars can be placed in your recycling bin.  
Please remove from the glass container first.
